

# FERNANDO BRITO

## Backend Engineer | Data Integration Engineer | Software Engineer (.NET / SQL)

Specialization: C# • .NET Core • SQL Server • Microservices & Data Architecture

Aracaju, SE – Brazil (Open to Remote) • Phone: +55 (79) 9 9915-9885 • [fernando.dev.brito@gmail.com](mailto:fernando.dev.brito@gmail.com)

**LinkedIn:**[linkedin.com/in/fernando-brito-8aa4271a7](https://www.linkedin.com/in/fernando-brito-8aa4271a7) • **GitHub:**[github.com/NandinAugusto](https://github.com/NandinAugusto)

### Professional Summary

Results-driven Backend Engineer with 4 years of solid experience in the development, maintenance, and architectural optimization of large-scale enterprise ERP systems. Specialized in mission-critical modules (fiscal, financial, billing, and inventory), designing resilient REST APIs with C# and .NET Core, legacy refactoring, and high-performance relational database tuning.

Deep practical expertise in SQL Server (advanced T-SQL, query execution plan diagnostics, indexing, and stored procedures) and hands-on experience in cross-database migration and ETL pipelines from heterogeneous engines (PostgreSQL, Oracle, MySQL, Firebird). Proven track record with asynchronous event-driven messaging (RabbitMQ), Docker containerization, fiscal integrations (SEFAZ XML/NF-e), and automated high-volume banking reconciliation (OFX data parsing).

Cloud and AI foundational knowledge validated by the official AWS Certified AI Practitioner credential. Strong academic background with an Associate Degree in IT Governance, a Bachelor's Degree in Systems Analysis and Development (in progress), and a Technical Degree in Systems Development.

### Professional Experience

#### Software Engineer (Back-End .NET & SQL)

01/2022 – Present

##### DP Sistemas – Aracaju, SE – Brazil

- Led backend development and architectural support for a nationwide enterprise ERP across fiscal, financial, billing, purchasing, and inventory modules, maintaining high availability in production.
- Automated fiscal integration workflows with government tax web services (SEFAZ) for processing +10,000 electronic invoices (NF-e)/month via C#/.NET XML manipulation, ensuring continuous compliance and minimal error rates.
- Engineered automated banking reconciliation and OFX parser services, processing +50,000 financial transactions/month, significantly reducing manual reconciliation overhead and eliminating accounting discrepancies.
- Executed proactive query performance tuning and index optimization in SQL Server, delivering noticeable response-time improvements across heavy reporting and monthly ledger closing routines.
- Architected and executed ETL pipelines consolidating over 1,000,000 records accumulated across data migration initiatives from heterogeneous legacy databases (PostgreSQL, Oracle, MariaDB, Firebird) into SQL Server with 100% referential integrity.
- Built resilient REST APIs for decoupling monolithic workflows into scalable services, implementing robust exception handling, consistent transactional boundaries, and system observability.
- Implemented background message queues using RabbitMQ to handle asynchronous financial processing and scheduled customer data dispatching jobs.
- Resolved 150+ critical production incidents via log analysis and query plan diagnostics, while contributing full-stack support with C#/.NET Core and Angular/TypeScript.

**Stack:** C# • .NET Core • ASP.NET Core • SQL Server • T-SQL • SEFAZ / XML • PostgreSQL • RabbitMQ • Docker • Angular • Git

Technical Skills

- **Back-end & Languages:** C#, .NET 8 / Core, ASP.NET Core, Entity Framework Core, Python, Java (Spring Boot), REST APIs, Microservices
- **Databases & SQL:** SQL Server (T-SQL, Stored Procedures, Performance Tuning), PostgreSQL, Oracle, MySQL / MariaDB, MongoDB, Firebird
- **Data Engineering & Integration:** Data Pipelines (ETL), RabbitMQ, Event-Driven Architecture, Government Tax Web Services (SEFAZ XML), Banking Parser (OFX)
- **Cloud, DevOps & Infrastructure:** Docker, AWS (AWS Certified AI Practitioner), Azure, CI/CD (Azure DevOps), Git / SVN, Linux
- **Quality, Testing & Architecture:** Automated Testing (xUnit, TDD), SOLID Principles, Clean Code, Design Patterns, JWT Auth, Scrum / Kanban, Code Review
- **Front-end & Web Technologies:** Angular, TypeScript, JavaScript, HTML5 / CSS3, Bootstrap

Engineering Projects & Portfolio

Financial Reconciliation & OFX Processing API — DP Sistemas (Production) — Microservices & Banking Integration

Decoupled microservice engineered for DP Sistemas ERP, handling automated ingestion, parsing, and ledger reconciliation of banking statements (OFX files) with accounts payable/receivable.

- Processes high transaction volumes (+50,000 banking transactions/month) leveraging an asynchronous event-driven architecture with RabbitMQ.
- Enforced strict idempotency rules against duplicate transaction processing, verified by automated unit tests with xUnit across core accounting rules.

Stack: C# • ASP.NET Core • Entity Framework Core • RabbitMQ • SQL Server • xUnit • Docker

Multi-Database Migration & Integration Engine — DP Sistemas (Production) — Data Engineering & ETL

Enterprise ETL solution designed to extract, transform, and load data from heterogeneous legacy databases into a unified SQL Server data repository with referential integrity.

- Consolidated over 1,000,000 records throughout project lifecycles, featuring dynamic schema mapping and normalization of legacy data structures.
- Automated fiscal rule validations and strict referential integrity checks throughout the migration pipeline.

Stack: C# • .NET Core • Python • SQL Server • PostgreSQL • Oracle • Firebird • Docker

Education

Bachelor's Degree in Systems Analysis and Development

Federal Institute of Sergipe (IFS) — In Progress (Expected Dec/2027)

Associate Degree in Information Technology Governance

FANESE – Faculty of Administration and Business of Sergipe — Graduated

Technical Degree in Systems Development

Federal Institute of Sergipe (IFS) — Graduated

Technical Degree in Industrial Automation

SENAI Sergipe — Graduated

Certifications & Courses

- **AWS Certified AI Practitioner**  
Completed & Certified in August 2026
- **AWS Certified Cloud Practitioner**  
In Progress — Target Completion: Nov/2026
- **Advanced SQL Server: T-SQL, Stored Procedures and Performance Tuning**  
Specialization Course
- **Microservices Architecture, REST APIs and ASP.NET Core**  
Specialized Training
- **Docker for .NET Applications and Cloud Environments**  
DevOps & Containers
- **Design Patterns, SOLID Principles, Unit Testing and TDD**  
Software Engineering Practices

Languages

- **English:** **Advanced (B2)** (Fluent technical reading, writing, and professional communication.)
- **Spanish:** **Intermediate (B1)** (Technical reading and intermediate professional communication.)
